

ELECTRICITY AND ENERGY DISTRIBUTIONS IN VARIOUS COUNTRIES

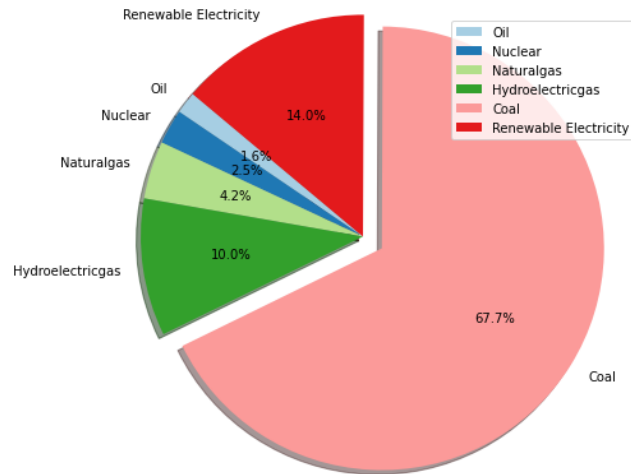

Electric Power Transmission and Distribution Losses - 2014

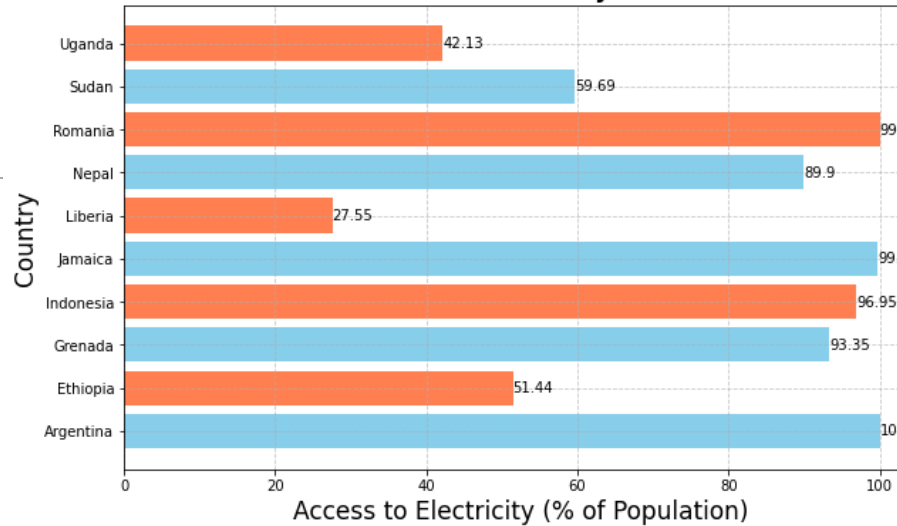

Sources (% of Total)

Energy Consumption Distribution in India - 2014

Access to Electricity - 2020

BRIEF:-

- ✓ Brazil had electric power transmission and distribution losses of 15.77% in 2014.
- ✓ Sri Lanka experienced a significant increase in the percentage of electricity production from oil sources between 1995 and 2005.
- ✓ India relies heavily on coal for electricity generation, indicating a need for diversification to address environmental concerns and promote sustainability.
- ✓ Argentina has achieved universal access to electricity, as indicated by the 100% value. This means the entire population in Argentina had access to electricity in the year 2020.
